

TINT, HENNA, WAX AND BROW LAMINATION

LAMINATION AFTERCARE

To keep your lamination looking fresh and lasting longer, please follow these aftercare steps

For the first 24-48 hours

-  NOT apply makeup directly onto the brows
-  KEEP your brows completely dry and AVOID steam, sweating or excessive heat
-  AVOID prolonged sun exposure or sunbeds
-  AVOID strong skincare products such as retinols and AHA/BHAs around the brow area

Once the 24-hour mark has passed

-  Make sure to keep your brows nourished with light cream or oil to maintain softness and shine
-  Begin brushing your brows daily to keep them styled and in place
-  **Plan to schedule your brow lamination appointments every 6-8 weeks**

Keeping up with the proper aftercare will help your brows stay healthy and lifted
