

# TINT, HENNA, WAX AND BROW LAMINATION

## TINT and HENNA AFTERCARE

For longer lasting results with your tint or henna brows, please follow these aftercare steps

### For the first 24-48 hours

-  NOT apply makeup directly onto the brows
-  KEEP your brows completely dry and AVOID steam, sweating or excessive heat
-  AVOID prolonged sun exposure or sunbeds
-  AVOID strong skincare products such as retinols and AHA/BHAs around the brow area
-  **To maintain colour and shape, plan to schedule your next tint or henna appointment in 4-6 weeks**

Keeping up with the proper aftercare will help your brows stay healthy and lifted
